### DETAILED ACTION

1. The indicated allowability of claims 1-12 is withdrawn after reviewing the reference(s) to Davies.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Davies 4,856,734. Davies discloses two three-way discharge changeover means positioned with 180 degrees between each other in a rotational symmetry around the perpendicular axis of the flying vehicle. (Figure 4 illustrates one of the three way discharge changeover means, the other being located at the other location #2 illustrated in Figure 1). It should be noted that the examiner has considered Figure 4 a “three way discharge changeover means” simply because it can divert fluid in three different ways. (1) Fully to the left (2) Fully to the right or (3) partially to each side of Figure 4. (see Col. 2, lines 25-29).

***Allowable Subject Matter***

4. Claims 2-6,8-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
